Building Permit Fee Schedule **Effective August 10, 2022**

FEE CALCULATION:

New construction; both residential and commercial, is based on the sum of all the gross horizontal areas of all floors of the building. This includes basements and garages. Attic floors are not included in this calculation unless they are designed for habitable rooms at a future date. All permit fees include building, plumbing, mechanical and electrical inspections.

New Residential: \$0.25 per square foot **New Commercial:** \$0.30 per square foot

Manufactured Housing or storage structures (all types) \$0.25 per square foot.

Additions to existing structures, including attached garages will be calculated in the same manner.

Unattached structures such as garages, barns, sheds, swimming pools, etc. will be calculated @ \$0.25 per square foot for residential and @ \$0.30 per square foot for commercial.

Renovations will be calculated by the square footage of the areas affected, e.g. a kitchen renovation fee would be based only upon the square footage occupied by the new design. Renovations not involving structural change will be charged according to the following fee schedule:

Electrical Permit	\$50.00	Mechanical Permit	\$50.00	Plumbing Permit	\$50.00
Chimney/Fireplace	\$50.00	Septic Systems	\$100.00	Foundation Only	\$50.00
		Swimming Pool	\$50.00	Demolition	\$50.00
			(minimum)		
Renewal Permit	50% of original cost, minimum \$50.00				

Demolition Permit – A permit is required for the demolition of any structure, regardless of age, past or present use, and for the removal of any existing in-ground or above-ground fuel storage tank (if replacement is not intended). Depending on the structure it may be necessary to evaluate for the presence of lead, paint, asbestos, or other hazardous waste. The State of NH has stringent requirements regarding the removal and dumping of these materials. Further information is available through Town Hall.

1. A permit shall be obtained for any repair, alteration or similar activity that includes any structural changes, plumbing, wiring or the creation of new space.
2. The Building Inspector should be contacted to discuss the extent of the project. He will determine if a building permit is necessary.
3. If the Building Inspector is aware of work being done without a permit being issued, the Building Inspector has the right to examine the project and determine the permitting required.

The Board of Selectmen, upon advice of the Building Inspector, may reduce or increase the building permit fee relative to the complexity of any project whose cost is in excess of \$1,000.00. In no event will a permit be issued for less than \$50.00.
