Excavation Application (cont.)

- **Reclamation Bond:**

A reclamation bond shall be required prior to the issuance of an excavation permit. The bond amount is established by multiplying the excavation pit surface acreage by _____ * per acre. (**This figure may vary with site conditions and should be reviewed annually.*)

- **Excavation Permit:**

The excavation permit will be valid for a period of _____ years**. An application for permit renewal should be submitted to the Regulator by the owner if excavation is to be continued beyond the termination date. The renewal application should identify and adjust all information contained in the original application that no longer is effective for the renewal period. (***This number can vary; however, three (3) years is suggested as a reasonable period. The reclamation bond should be negotiated as a step in each renewal.*)

This is to certify that the information contained in this application is complete and true to the best of my knowledge.
